Finally, here's how the most prolific pollsters fared in the general election.

The best-performing pollster was AtlasIntel!

Second was Trafalgar!

Yeah, they incorrectly had Trump winning a few states, but they were close on the margins, and that's the better metric.

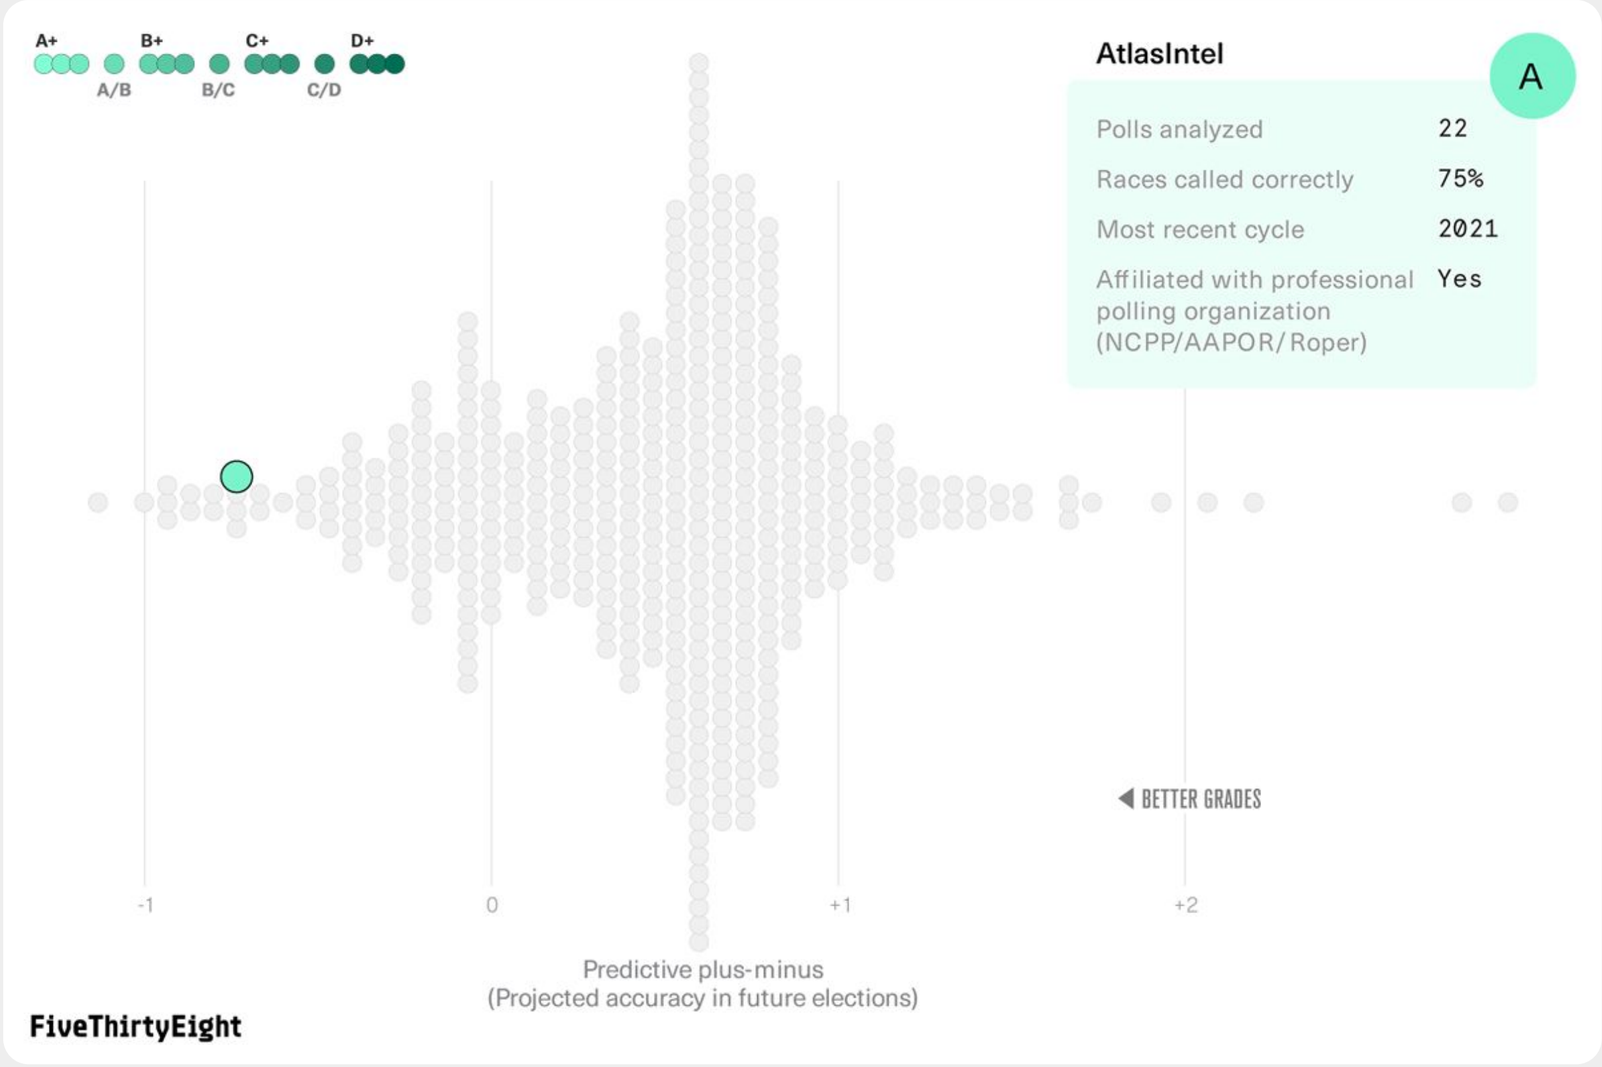
Polls by "select pollsters" are shown with a diamond. These pollsters have backgrounds that tend to mean they are more reliable. Also, polls that were conducted by or for partisan organizations are labeled, as they often release only results that are favorable to their cause.

AtlasIntel was the only web-based polling company with an A-rating in the last edition of Nate Silver's FiveThirtyEight pollster ranking, which evaluated the historical accuracy and the methodological quality of polls.



AtlasIntel

AtlasIntel was the most accurate pollster of the last three election cycles in Argentina (presidential elections, legislative primaries, and legislative elections).

In each of the three election cycles, AtlasIntel had the lowest polling error. In 2023, AtlasIntel was the only pollster to correctly indicate the winners of both the 1st Round (Sergio Massa) and the runoff (Javier Milei).

AtlasIntel was the most accurate pollster of the 2022 Constitutional Plebiscite in Chile

Public and private AtlasIntel polls accurately captured the dynamics of voter mobilization and came closer to the final vote count than any competitor.

AtlasIntel public releases both before and after the start of the poll blackout period indicated that slightly more than 58% of Chilean voters would vote to reject the new constitution; with 61,8% of votes cast against the new constitutional text, AtlasIntel came closest to the final outcome regardless of whether one considers polls released before or during the blackout period.

AtlasIntel

AtlasIntel was the only pollster to correctly anticipate the deadlock resulting from the 2023 legislative election in Spain

With an error of less than a tenth of a percentage point, AtlasIntel was the only pollster to correctly estimate the difference between the PP and the PSOE as well as the difference between the ideological left-right blocks. The surprising result resulted in a legislative deadlock.

El Confidencial

La única encuesta que ha clavado los resultados del 23-J se hizo en São Paulo: "Era un experimento"

En un contexto en el que las casas de encuestas están siendo criticadas por sobreestimar a la derecha, a Atlas Intel le bastó un único sondeo el 17 de julio para acertar más que ninguna
