Some readers wonder [how we come up with our job approval ratings for the president](#) since they often don't show as dramatic a change as some other pollsters do. It depends on how you ask the question and whom you ask. To get a sense of longer-term job approval trends for the president,

Rasmussen Reports compiles our tracking data on a full month-by-month basis. Rasmussen Reports has been a pioneer in the use of automated telephone polling techniques, but many other firms still utilize their own operator-assisted technology ([see methodology](#)).

Daily tracking results are collected via telephone surveys of 300 likely voters per night and reported on a five-day rolling average basis. To reach those who have abandoned traditional landline telephones, Rasmussen Reports uses an online survey tool to interview randomly selected participants from a demographically diverse panel. The margin of sampling error for the full sample of 1,500 Likely Voters is +/- 2.5 percentage points with a 95% level of confidence. Results are also compiled on a full-week basis and crosstabs for [full-week results](#) are available for [Platinum Members](#).
