AtlasIntel was also the most accurate pollster of the 2020 presidential election.

In 2020, Atlas polls had an average error of 2pp. They anticipated election results within the margin of error in all swing states. 2020 was the worst cycle for the US polling industry in four decades.*

Nate Silver
@NateSilver538

Replying to @NateSilver538

Finally, here's how the most prolific pollsters fared in the general election.

The best-performing pollster was AtlasIntel!

Second was Trafalgar!

Yeah, they incorrectly had Trump winning a few states, but they were close on the margins, and that's the better metric.

AtlasIntel was 2020’s most accurate pollster

Average error of polls in final 21 days before the 2020 general election, for pollsters that conducted at least 10 polls

Ruth Igielnik
Staff editor, polling

Polls by “select pollsters” are shown with a diamond. These pollsters have backgrounds that tend to mean they are more reliable. Also, polls that were conducted by or for partisan organizations are labeled, as they often release only results that are favorable to their cause.

AtlasIntel was the only web-based polling company with an A-rating in the last edition of Nate Silver’s FiveThirtyEight pollster ranking, which evaluated the historical accuracy and the methodological quality of polls.

AtlasIntel was the most accurate pollster of the last three election cycles in Argentina (presidential elections, legislative primaries, and legislative elections).

In each of the three election cycles, AtlasIntel had the lowest polling error. In 2023, AtlasIntel was the only pollster to correctly indicate the winners of both the 1st Round (Sergio Massa) and the runoff (Javier Milei).

2019 Argentina Presidential Election Polls

AtlasIntel was the most accurate pollster of the 2022 Constitutional Plebiscite in Chile

Public and private AtlasIntel polls accurately captured the dynamics of voter mobilization and came closer to the final vote count than any competitor.

AtlasIntel public releases both before and after the start of the poll blackout period indicated that slightly more than 58% of Chilean voters would vote to reject the new constitution; with 61,8% of votes cast against the new constitutional text, AtlasIntel came closest to the final outcome regardless of whether one considers polls released before or during the blackout period.

AtlasIntel was the only pollster to correctly anticipate the deadlock resulting from the 2023 legislative election in Spain

With an error of less than a tenth of a percentage point, AtlasIntel was the only pollster to correctly estimate the difference between the PP and the PSOE as well as the difference between the ideological left-right blocks. The surprising result resulted in a legislative deadlock.

El Confidencial

La única encuesta que ha clavado los resultados del 23-J se hizo en São Paulo: "Era un experimento"

En un contexto en el que las casas de encuestas están siendo criticadas por sobreestimar a la derecha, a Atlas Intel le bastó un único sondeo el 17 de julio para acertar más que ninguna

Roman (izquierda, camisa gris), junto al equipo de Atlas Intel que ha realizado la encuesta desde Brasil. (Cedida)
