

Marquette Law School Supreme Court Poll January 21 - 28, 2026

National Issues only

(Percentages are rounded to whole numbers for reporting of results. Frequencies have been rounded to whole numbers but percentages are calculated based on non-integer weighted sample sizes.)

Results for survey items among all respondents are presented here (unless otherwise indicated). Please note that some questions are only asked of particular groups of respondents. In these instances, the row NAs includes the number and percent of total respondents omitted from the question. These omitted cases are ignored when calculating the Valid and Cumulative percent columns.

Follow politics

Some people seem to follow what's going on in politics most of the time, whether there's an election going on or not. Others aren't that interested. How often do you follow what's going on in politics...?

	Most of the time	Some of the time	Only now and then	Hardly at all	n

Data centers cost/benefit

Tech companies like Google and Meta are investing billions of dollars around the country in construction of data centers to run artificial intelligence or AI models and other applications. Which comes closer to your opinion, even if neither is exactly right:

	The benefits of the data centers outweigh the costs	The costs of the data centers outweigh the benefits	n
