

2WAY HarrisX Overnight Poll: NATO Summit

This survey was conducted within the United States from July 9th to 10th among 1,019 registered voters. Recruitment occurs though a broad variety of professional, validated respondent panels to expand the sampling frame as wide as possible and minimize the impact of any given panel on recruiting methods. The results reflect a nationally representative sample of registered voters. Results were weighted for age, gender, region, race/ethnicity, income, political party, education, and ideology where necessary to align them with their actual proportions in the population. The margin of error for the total sample is +/- 3.1 percentage points.
